XPRI NS

Non-Linear Editor designed for News, Magazine and Sport

XPRI NS is a non-linear editor designed primarily for use in News, Magazine and Sport applications. As part of a SONAPS installation or as a standalone application, it offers the best possible integration with XDCAM and XDCAM HD - the world's bestselling non-linear acquisition system. Full resolution and proxy AV XDCAM content is handled seamlessly, while the handling, manipulation and integration of XDCAM metadata is second-to-none for a truly state-of-the-art workflow solution.

Although the focus on News, Magazine & Sport applications is different to the original XPRI NLE system XPRI NS inherits XPRI's familiar user interface and core technology. This helps ensure XPRI NS is easy-to-use, very stable and highly responsive. A customizable GUI further extends user-friendliness and supports exceptional workstation flexibility.

XPRI NS is a powerful and flexible NLE, supporting mixed editing of Standard Definition/High Definition, Proxy/High-resolution content, as well as advanced HD operability and superior HD LongGOP editing performance.

XPRI NS is available as an integrated part of SONAPS installations and also in a standalone version.

Features

Fast, extremely responsive and stable

Fast, simple and effective NLE for news, sport and magazine applications

Customizable GUI to cope with various editing styles

Extensive customization settings can be saved for each user and automatically loaded at log-on.

Powerful long GOP editing

Advanced HD operability with superior Long-GOP (Group of Pictures) editing performance, ideal when editing formats such as XDCAM HD and HDV which record using Long GOP technology.

Mixed editing of SD/HD & proxy/high-resolution

- HD 4:2:0 59.94i/50i 18/25/35 Mbps
- DV/DVCAM 59.94i/50i
- HDV 59.94i/50i
- IMX 30/40/50

Simple system configuration

XPRI NS can be supplied as software only or with a hardware I/O board. It can be used on a laptop or workstation, standalone or networked.

Linear-like editing

Supports pre-roll editing & BVE type control panel

Benefits

Delivers a world-leading total workflow solution

When combined with SONAPS, XPRI NS delivers a state-of-the-art total workflow solution for News, Magazine and Sports applications.

Ease-of-use minimises training costs and maximise workstation flexibility

The original XPRI GUI was designed to be as familiar as possible to experienced editors and was continually refined over a six-year period prior to the launch of XPRI NS.

In addition, the XPRI NS GUI supports easy customisation to support any editing style, with adjustable window size and alignment, button functions and

onscreen location (source viewer, master viewer and timeline window).

Individual user settings maximise workstation flexibility

Each user can save their own individual settings which are loaded each time they log onto the system. This

means a single XPRI NS workstation can easily be used by both journalists and craft editors.

Seamless integration with world's best nonlinear acquisition system

XPRI NS is designed as the best possible partner for the advanced workflow capabilities of the Sony XDCAM family, including XDCAM HD.
